

How to Make Porcupine Hedgehogs

Sol, the hedgehog

To make this cute hedgehog character you will need a pinecone and some clay. Take some tan clay and push it into the front of the pinecone...then try to form it into a bell-like shape as seen in the 2nd picture above. Make 4 oval shapes and stick them on the bottom of the pinecone for the feet. Take black clay and form it into a ball and push it onto the tip of the bell-shaped clay for the hedgehog's nose. Form 2 more black ball shapes for the eyes. Form the smile by drawing it in with a toothpick. Draw in the toes with the toothpick as well. Take some tan clay and form it into a small ball to use as one of the ears...do the same for the other ear. Let dry to harden.
